

Everpure Sale

While quantities last, the following Everpure under-sink water systems are on sale:

- Model H-300 - Capacity 300 gallons
- Model H-54 - Capacity 750 gallons
- Model QC4-THM - Capacity 700 gallons

For full details, visit our website, <http://www.foustco.com/index.asp> or call us at 1-800-353-6878

Letter from the President Joe Muchow

It's allergy season again folks, which means those of you who suffer from allergies will be spending more time indoors relying on clean air. Unfortunately, indoor air quality is not always as clean as we would hope. Well, we have a solution for you; we have three possible air purifiers for your home. The [160R2 room unit](#), the [160DT desktop unit](#), and the [Series 400 unit](#) for larger rooms. These units will help keep your indoor air free of harmful and irritating particles. For those of you who may be traveling this summer, we also offer a [160AN auto unit](#). With a simple purchase of a [converter](#), you can breathe clean air in your hotel room as well. We hope this can make your summer more comfortable.

Bored this summer? Want to eliminate the summer doldrums? We have idea; why not fix up your home? We have MANY products available for you to use. Later in this issue, we will address some of our more common products used in home repair. If you decide to do any household projects, why not make them safe and healthy for you and your family.

In other recent news, steel prices continue to increase at rapid rates. We use steel for our air purifiers and unfortunately, our prices have to increase as well. The following products have suffered price increases: [160R2](#), [160DT](#), [160AN](#), [400 Media Tray](#), [400 FC Media Tray](#), [Air Sentry Media Tray](#), [Air Sentry FC Media Tray](#), as well as [fume and odor panels](#). For more information look further in the newsletter and see how you can help keep prices down.

We continue to enjoy and savor our 31st year of business and hope to continue to help our customers breathe cleaner air, drink cleaner water, and live healthier lives.

FACE MASK OF THE MONTH

The carbon media in the 3M Dust/Mist Respirator Mask provides relief from nuisance odors (not fumes, gasses, vapors, or paint spray operations). While the mask is not designed for MCS, our customers with MCS use it without a problem.

ATTENTION!!!

HELP US TO KEEP COSTS DOWN BY RECYCLING USED CARTRIDGES!

You may be aware of our cartridge refund policy, which is included with each shipment of the [replacement cartridges](#). We feel this is a good recycling program that helps to keep our costs down. This process also helps the environment by not having them thrown in the trash heap, plus the added advantage to you by getting a \$10.00 refund for each empty cartridge returned. However, due to rising steel costs, and some of our customers not taking advantage of the policy by returning the empty cartridges to us, it may be necessary to raise the deposit charge from \$10.00 to \$15.00 if we don't get an immediate response on the returns. If you need any help in locating an authorized DHL shipping center, besides the Office Max location, please let us know when you call in your order and we

IF IT DOES NOT PROTECT MY TEETH, WHY IS IT IN MY WATER?

Many local water departments in American communities add fluoride to the drinking water supply. The thinking once was that this form of fluoride ingestion would improve dental health without people having to "think too much" about it. Since then, researchers, health care experts, and the dental community have disputed the positive benefits of fluoridated water. Moreover, research now shows there are significant negative affects of drinking fluoridated water, particularly for children who are vulnerable to neurological toxicity caused by fluoride exposure. China, Austria, Belgium, Finland, Germany, Denmark, Norway, Sweden, The Netherlands, Hungary, and Japan have all stopped adding fluoride to their drinking water, primarily for health reasons.

Carbon filtration systems are not as effective at removing fluoride compounds from water as systems designed specifically for that purpose. E.L. Foust has introduced the Hurley line of water filtration systems that accomplishes fluoride removal. If you already have a particle filter, a fluoride filter can be added... if not, a particle filter is needed and can be purchased through us. To view these products, use the following links:

- [Ceramic Particle Filter](#)
- [Fluoride Filter](#)

To view all of our water filters, and water filtering accessories please click [HERE](#).

There is an abundance of information on the internet about Fluoride. See the links below, as well as the source of these links, <http://www.holisticmed.com/fluoride/>

UPCOMING CONFERENCES

E.L. Foust makes it a priority to attend relevant conferences and trade shows in order to educate consumers and us.

The International Academy of Oral Medicine and Toxicology ([IAOMT](#)):

Annual meeting September 8 - 10 2005
Las Vegas, NV

American Academy of Environmental Medicine ([AAEM](#)):

Annual Meeting - October 26-30, 2005
Tucson, AZ

American Academy of Otolaryngic Allergy ([AAOA](#)):

Annual Meeting - September 22-24 2005
Los Angeles, CA

Advanced Instructional Course - December 7-11 2005 Park City, UT
ENDOMETRIOSIS ASSOCIATION at <http://www.endometriosisassn.org/> :

Annual meeting - October 7-8 2005 Milwaukee, WI

QUESTIONS AND ANSWERS

Q: How do I know when to use AFM's Hard Seal or Safe Seal?

A: Hard Seal is a hard coating and goes on previously painted or coated surfaces. It is a surface coating to seal up a multitude of outgassing and is meant to be touched. Safe Seal is used specifically on raw particle board & plywood to seal up formaldehyde outgassing. It never dries hard, it remains tacky. You never use Safe Seal as a final coat.

Q: How do I know what the MERV rating really means?

A: Residential filters commonly have MERV ratings of 1-11 (We offer MERV ratings up to 12). The higher the MERV rating, the more efficient the filter is, and the more particles it can filter.

- A MERV rating of 6 means the filter is 35% to 50% minimum efficient at capturing particles, sized 3.0-10.0 microns.
- A MERV rating of 8 means the filter is 70% to 85% minimum efficient at capturing particles, sized 3.0-10.0 microns.
- A MERV rating of 11 means the filter is 85% to 95% minimum efficient at capturing particles, sized 3.0-10.0 microns.

Thinking About Any Household Projects This Summer?

Well, we have the answer for you! Before you make the trek to the hardware store in the blistering heat, consider our line of safe building supplies. We carry a full line of AFM SafeCoat paints, sealers, stains, carpet and cleaning products. The AFM products are always a safe alternative to the name brands found at the store and all products can be used in the home or office; for construction purposes or to replace existing materials that may have strong outgassing. Visit our website, <http://www.foustco.com/index.asp>, today for more information on the safe building solutions that we offer. In addition to the AFM products that we sell, we also sell tape, Dennyfoil, and a variety of caulking products for any other building supply needs. If you aren't sure if you want to purchase large amounts of the paint just yet, you can always try a sample first.
