

## Letter From The President

It's Summer time, and that means vacations, relaxation, and FUN.

We're happy to announce our links page has continued to grow. It's bigger, better, and filled with useful & amazing resources.

To view the links page, [click here](#).

Also added to our site are REAL LIFE customer statements we've received over the past few years. Customer statements are always appreciated and word of mouth is the best way to spread a business. So feel free to continue sending us your E. L. Foust story.

To view the Customer Testimonials page, [click here](#), and to add a statement, e-mail [jessicas@foustco.com](mailto:jessicas@foustco.com).

As most of you know, we offer THREE purifiers for your home, office, or even hotel room... the [160R2](#) room unit, the [160DT](#) desktop unit and the [Series 400](#) for larger rooms. More importantly we offer an auto air purifier, [160AN](#), perfect for a **road trip** or a long ride to your **vacation** spot.

If you plan on staying in a hotel, remember your 160AN auto unit can be brought INSIDE and used with the simple

## AFM Corner

### Questions and Answers:

**Q.** What AFM product should I use to seal a granite countertop?

**A.** AFM does not have a product for this. They recommend that you contact the company that put it in, or if it was in the home when you bought it, contact a local supplier for their advice.

**Q.** Can I use the [3-N-1 Adhesive](#) on wood flooring?

**A.** No, you never want to use a water-based adhesive for wood flooring because it could severely warp the wood.

**Q.** Does SafeChoice [X-158](#) kill mold?

**A.** No, it acts as a sealer only. Surfaces must be decontaminated before applying [X-158](#). Subsequent applications will also be required.

purchase of a [converter](#).

This can help make your next few trips that much more enjoyable.

Whether you're vacationing or not, one thing we can all agree on is that GAS PRICES ARE CRAZY. Unfortunately, we're all feeling it in the bank account. E.L. Foust Co., like everyone else, needs to try and accommodate these prices... you may have noticed a slight jump in shipping prices.

We're just as discouraged as everyone else, but we'll keep trying to keep shipping costs under control. Part of trying to keep prices low, includes remembering to keep returning your used, EMPTY, cartridges.

Once again we'd like to thank each and everyone of you for being an E.L. Foust customer.

We appreciate your business and your positive outlook for a better future.

Whether you have MCS, allergies, asthma, or you're environmentally aware, YOU contribute to a better tomorrow!

HAVE A SAFE AND HEALTHY SUMMER!

Joseph Muchow, President

### Tips:

- We can match up a paint color you like or have previously used by other major paint distributors. We would need the color "code". Although we cannot guarantee this is possible with EVERY color, about 99% of the time we can match them up.
- We also carry the [AFM fan deck](#) of all the AFM color choices. There is a \$25 cost which can be refunded if the deck is returned in good condition.

Click the picture above to view our AFM products.

### Featured Product

### Dennyfoil, Vapor Barrier

" Here's the finest reflective insulation cap barrier for your money. Meets all FHA requirements for vapor protection on floors, sidewalls, ceilings and linings between loose subfills and concrete. Dennyfoil Vapor barrier cuts mildew and dampness, reduces inner wall condensation, retards combustion. It is clean, light, and easy to install." - Dennyfoil

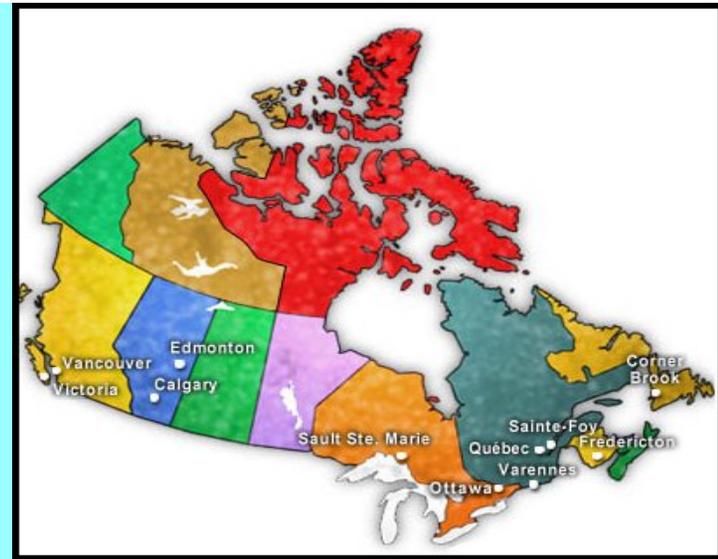

### Shipping To Canada Just Got Easier!

Dennyfoil is the vapor barrier of choice for people with Multiple Chemical Sensitivities (MCS) and is recommended by environmental consultant Mary Oetzel for sealing off formaldehyde and many other chemicals that are commonly found in homes. It consists of double sided aluminum foil with a heavy duty kraft paper in between. It can be used under or on floors, walls, and cabinetry.

When applied to ceilings and floors, Dennyfoil saves 50-60% heat loss. On walls, it retains 50% more heat. In attics and roofs, there is a summer reduction of 20 degrees. Dennyfoil also helps cupboards and pantries stay dry and radiators and water heaters operate more efficiently. It comes in rolls that are 36 in. by 166 linear feet, (500 sq.ft), and has a thickness of 0.004 inches. Dennyfoil will seal against odors, vapors, etc., and is a radiant barrier.

We also carry 3 different types of [aluminum tape](#) to apply the Dennyfoil.

We have Shurtape (which comes in either [2"](#) or [3"](#)). We also carry Reel Tape which comes in either [Acrylic Adhesive](#), or [Synthetic Rubber Adhesive](#).

For those of you living in Canada, we realize you're getting hit hard on shipping costs for items imported from the United States.

Luckily, DHL, our shipping company, has just offered a way for us to get items shipped to you OVERNIGHT for less money than you might expect. Call for details!

Once again this is overnight ONLY. Also, there is an exception to people living in rural areas, the items should still get there quicker, but we cannot guarantee overnight.

Since this is still quite a new feature for you, as well as us, we will be looking into orders to make sure DHL's promise is kept.

For further information, questions, or concerns, feel free to call us!
