Everpure

"None of Everpure's S-series models will be appearing on our domestic residential website any longer. Many dealers and distributors have bemoaned the number of Everpure stock keeping units they needed to inventory. Consequently, a couple of years ago Everpure opted to offer only the H-series here in the United States.

For the most part, the S-series paralleled the H-series. The H-series, with its lime scale reduction, has been the much more popular series. Everpure executed the withdrawal from the S-series in stages, eliminating systems first, while replacement cartridges remained available. This gave our distributors time to effect a changeover with their customers. Some were more effective at that than others. This year, S-series cartridges are no longer available. Please refer to the following chart for recommended conversions." - Everpure Corporate Office

Old S-Series Model	Current H-Series Model / Replacement Cart
S-54	H-54
S-100	H-100 or H-104 (Lead Reduction)
S-104	H-104
S-200	H-300
QC4-VOC	H-1200
