

# Flask Cleaning Brushes

- Proven operation
- Better corner & side cleaning
- Lower scrap costs
- Increase production

The Schaefer Flask Cleaning Brush is designed to provide superior cleaning of the cope and drag during the punch out operation. Your brushes will be made to bolt directly to the punch out plate of your existing equipment.

Schaefer's rugged 1" x 2" Aluminum Brush blocks can be filled with heavy nylon or wire as follows:

- 1 row (wire or nylon)
- 2 rows (example: 1 row wire/1 row nylon)
- 3 rows (example: 2 outside rows wire/middle row nylon)

The aluminum holder can be REFILLED with new bristles to save on replacement cost.

The flask dimensions W, L, R and the punch out plate dimensions with the bolt hole locations must be supplied with orders.
